

Project Geologist

Hemlo Mining Corp. is a growing Canadian gold mining company focused on the responsible development and operation of the Hemlo Gold Mine in Northwestern Ontario.

If you thrive on challenge, collaboration, and meaningful work, Hemlo Mining Corp. offers rewarding opportunities. Our people are the foundation of our success, and we're looking for motivated, energetic individuals who are eager to learn, grow, and contribute to safe and efficient operations on all our properties. We support the professional aspirations of our team through training, development, and a comprehensive compensation package.

Hemlo Mining Corp., operating near Marathon in Northwestern Ontario, currently has an opportunity for a:

Project Geologist

Position Description:

Reporting to the Senior Geologist, the Project Geologist will provide technical and operational support across all geology functions at Hemlo Mining Corporation. This role offers exposure to a wide range of geological activities, including underground mine geology, resource growth and development, exploration, core logging, geological modelling, mapping, sampling and field programs.

The successful candidate will work closely with the Growth, Underground Mine Geology, and Exploration teams, supporting geological programs both underground and at surface. The position requires a solid technical foundation; sound analytical acumen and have a strong drive for operational excellence and high achievement.

Responsibilities:

- Demonstrate a strong commitment to workplace health, safety, and environmental stewardship.
- Support geological activities across Underground Mine Geology, Growth, and Exploration projects.
- Conduct underground geological mapping, sampling, ore control activities, and stope inspections.
- Complete geological, structural, and geotechnical mapping in underground and surface environments.
- Log, interpret and model data from diamond drill core.
- Assist with field exploration programs, mapping, and sampling initiatives.
- Collect, validate, and maintain geological data and databases.
- Assist with geological modelling, interpretation, and resource development projects.
- Perform data entry, QA/QC reviews, and technical reporting.
- Support core facility operations, including core handling, photography, sampling, and inventory management.
- Collaborate with technical services, operations, contractors, and exploration personnel to achieve project objectives.
- Assist with special projects and geological investigations as required.

- Work in a variety of environments including underground workings, surface operations, core facility, remote field locations, and drill programs.
- Perform other duties as assigned.
- **Qualifications:**
- Bachelor of Science Degree in Geology or Geological Sciences required.
- Registration or eligibility for registration as a Professional Geoscientist (P.Geo.) in Ontario.
- Minimum 4 years' experience in mineral exploration or active mining operations.
- Strong understanding of geological mapping, sampling, logging, and data management principles.
- Solid foundation of geological principles and ore deposit models. Experience in Archean gold systems typical of the Canadian Shield would be considered an asset.
- Experience with geological software such as Leapfrog, Vulcan, AcQuire, Deswik, or similar platforms. Basic proficiency with GIS platforms considered an asset
- Strong communication, organizational, and problem-solving skills.
- Ability to work independently and collaboratively within multidisciplinary teams.
- Ability to work safely in underground mining, surface operations, and field exploration environments.
- Strong presentation and verbal skills. Able to communicate ideas and recommendations in both written and verbal forms across all levels of the organization in a clear manner.
- Valid Class G driver's license required.
- Ability to operate a manual transmission vehicle.
- Physically capable of working underground, in the field, and lifting up to 50 lbs.
- Highly motivated, adaptable, and eager to learn across multiple geological disciplines.

What We Can Offer You

- Base salary range from \$105,000 to \$125,000 per year, depending on experience and qualifications.
- Comprehensive compensation package including competitive bonuses, benefits, and pension contribution.
- Progressive career path with opportunities for advancement.
- Work in a dynamic, collaborative, and high-performing team.
- Access to experienced mining professionals for knowledge-sharing, mentorship, and skill-building.

Equal Employment Opportunities

- Hemlo Mining Corp. is committed to creating an inclusive, respectful workplace and is proud to be an equal opportunity employer.
- We operate on the traditional territory of Biigtigong Nishnaabeg and Netmizaaggamig Nishnaabeg and we are committed to fostering meaningful relationships and employment opportunities with Indigenous Peoples. First Nations, Inuit and Métis persons are encouraged to apply.
- We also welcome applications from people with disabilities. Accommodations are available on request for candidates taking part in all aspects of the selection process.
